Stratabugs & Add-On Packages

STRATABUGS ADD-ON PACKAGE

- Stratabugs-ready database file (H2) of fossil distribution data and Paleo Data Inc. interpreted tops.
- No more fumbling over .csv's and translating taxa.
- One size-efficient file with all your data, viewable with Stratabugs 2.1 or later.
- Comprehensive quarterly supplement data files.

One-time fee with annual supplemental data subscription.
Full release delivery: 4th quarter 2019.
Subscription waived until full release.

EXCEL ADD-ON PACKAGE

- Convert PDFs, Word docs, etc. into Excel (csv) raw data files.
- Up to 100 files per annual subscription.
- Only available as add-on to offshore database package.

MAP PACKAGES

A regional map greatly diminishes analytical time and effectively illustrates data. Paleo Data Inc. and Earth Studies Group now offer GoM map packages for 46 time periods in the Cenozoic and 14 time periods in the Mesozoic. Map packages are available individually, by chronosequence or as the entire suite.

MAP PACKAGES INCLUDE:

- Stratigraphic depth.
- Isostatically-adjusted stratigraphic depth.
- Excess subsidence.
- Accumulation rate.
- Maximum accumulation rate.
- Ecozone or Paleobathymetry (based on benthic forams).
- Lithobiofacies (based on benthic forams).
- Estimated percent sand (based on lithobiofacies).
- Estimated gross sand accumulation rate (based on lithobiofacies).
